In addition, the array of world-class attractions in

Hampton and within 30 miles of the city is equally attractive to attendees as it is to families who might want to come along to explore Coastal Virginia before or after a meeting.

Visit attractions spanning a timeline that begins with the arrival of three sailing vessels in 1607,

extends through the colonial and Revolutionary War period, includes significant Civil War developments and continues through America's journey to the stars. Discoveries have been integral to Hampton since it was founded in 1610, making it the oldest continuously occupied English settlement in the United States. Hampton is also the original home of NASA, the agency responsible for leading America into the exploration of outer space.
